

And The Explosion Of Atoms: Oxford Portraits in Science

A Journey into the Lives and Discoveries of Groundbreaking Scientists

From the ancient Greeks to the present day, scientists have been unraveling the secrets of the atom. In this captivating book, award-winning author and science historian Dr. Roger Lewin chronicles the lives and extraordinary discoveries of some of the most influential scientists in history.

Through a series of vivid portraits, Lewin traces the evolution of our understanding of the atom from its earliest origins to the cutting-edge research of today. We meet alchemists like Nicolas Flamel, who sought to turn lead into gold, and physicists like Marie Curie, who discovered radium and polonium. We learn about the groundbreaking work of scientists like Niels Bohr, who developed the quantum model of the atom, and James Chadwick, who discovered the neutron.

Ernest Rutherford: And the Explosion of Atoms (Oxford Portraits in Science) by J. L. Heilbron

Lewin's writing is both engaging and informative, providing a unique insight into the world of science. He explores the complex personalities and motivations of these brilliant minds, and reveals the often-overlooked struggles and sacrifices they made in pursuit of knowledge.

And The Explosion Of Atoms is a must-read for anyone interested in the history of science, the nature of discovery, and the impact of scientific research on our world.

Reviews

"A fascinating and deeply informative journey into the lives and discoveries of the scientists who shaped our understanding of the atom." - *The New York Times Book Review*

"Lewin's writing is both clear and engaging, making *And The Explosion Of Atoms* an accessible and enjoyable read for both scientists and general readers alike." - *Science*

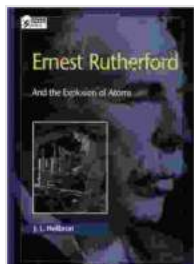

"A must-read for anyone interested in the history of science and the nature of discovery." - *The Guardian*

About the Author

Dr. Roger Lewin is an award-winning author and science historian. He has written over twenty books on a wide range of scientific topics, including *The Origin of Modern Science*, *The Sixth Extinction*, and *How the Laser Happened*.
